Product owners, software developers, and Scrum Master are set and ideally don't change over time; the critical part is the Release Manager role you need to define here						

<b>Goals</b>	Having a good time as a team and learning about technology
	Working product that meets requirements
<b>Meeting norms</b>	Keep Agenda. Additions to Agenda need to be communicated in Slack beforehand, so everybody can prepare
	Start on Time and also end on time (I have work right afterwards)
<b>Working norms</b>	communicate openly and respectfully with each other especially in case of conflicts or diverging opinions
	Ask questions as soon as you get stuck and don't try to grind through on your own
<b>Coordination norms</b>	Team Meeting: PO or SM
	Assignment: PO for the respective component
<b>Communication norms</b>	acknowledge within a day to direct questions (excluding maybe weekends), communicate via slack public except for e.g. meeting for pair programming
	As few tools as possible, . Its best to report issues as early as possible and be direct.
<b>Consideration norms</b>	Keep side conversations for the end of the meeting, so people who have to leave on time can do so
	We take everybody's opinion into consideration but final decision should be taken by voting
<b>Cont. improvement norms</b>	track progress: github board, evaluate work: code reviews etc?
	Suggestions for improvements are always welcome
<b>Rewards</b>	By receiving good feedback from the teaching team or achieving a milestone we can meet for a coffee! :)
<b>Sanctions</b>	conflicts / not meeting obligations probably not due to ill intent, so talk with the person to find out reason and find a solution
	ideally everybody takes responsibility but this should be decided case by case.
<b>Signatures</b>	
Scrum Master	Rahil Soni
Product owner	Nahrain Gtari
Product owner	Andreas Freund
Software developer	Sebastian Alberto Rodriguez Schmidt
Software developer	Wiktor Pilarczyk
Software developer	Leon Wilms
Software developer	Michael Bauer
Software developer	Dorothea Ehrl
Software developer	Paul Roy

Product Vision	Project Mission
<p>The reason of existence of the envisioned product (beyond this project). The product vision consists mainly in providing a reliable Flash Boot Loader that allows updating embedded software in automotive systems for users regardless of their technical expertise.</p>	<p>The mission of this particular project (in the context of the product vision). Our project mission consists mainly in developing a robust Flash Boot Loader with a user-friendly GUI that enables users, regardless of their technical expertise, to update the firmware on Aurix-based TC375 automotive embedded devices via the CAN Bus in an efficient and easy way. The project structure should allow Hella to adapt it to different platforms.</p>

Sprint	Goal	Feature Name	Est. Size	Est. Remaining	Real Size	Real Remaining
Release						
Total			70	70		
Sprints						
7		Prepare for Flashing of the ECU	31	70	0	70
8		Flashing of the ECU	21	39	0	70
9		Can FD & Documentation	18	18	0	70
10		Testing (Reliability & Spec-Compliance)				
11		Industry Partner Handover Tasks				
12		Prepare for Final Release				
...				0		70
Features						
7		[WIN] Implement the CAN bus bitrate selection	3			
		[MCU] Implement flash date display and flash persistence module	5			
		[WIN] Add connectivity indicator	5			
		[MCU] Adjust linker-script for bootloader	5			
		[MCU] Create dummy ASW for demonstration purposes	5			
		[WIN] Validation of firmware file	8			
8		Flash ECU Firmware	8			
		Implement Firmware Update Notifications	5			
		Check license of 2 .dll files in release .zip file	3			
		Jump to ASW from Bootloader	5			
9		Implement CAN FD				
		[MCU] CAN FD Driver	5			
		[WIN] CAN FD Wrapper	5			
		[WIN] Integrate CAN FD with the GUI	5			
		Verify Firmware Update (Post Flashing)	3			

Sprint	Goal	Feature Name	Est. Size	Est. Remaining	Real Size	Real Remaining
10		Create CANoe config for IsoTP, UDS compliance testing				
		Update User documentation	5			
11						
12						

Sprint	Goal	Feature Name	Est. Size	Est. Remaining	Real Size	Real Remaining
Release						
Total			137	137		
Sprints						
1		Research	0	137	0	137
2		Setup projects, High risk tasks	33	137	29	137
3		Combine modules	28	104	33	108
4		Get IsoTP & UDS working	41	76	41	75
5		Demonstrate end to end communication between GUI and MCU using some actual features	5	35	2	34
6		Get ready for mid-project release: UI cleanup & small refactoring	30	30	0	32
7				0		32
Features						
1	4	Align on a GUI framework				
1	1	Create Logo				
1	3	Get familiar with CAN-Bus, Aurix IDE, MCU programming				
2	13	Initialize software bill of materials	1		1	
2	10	[MCU] CAN driver	5		5	
2	9	[MCU] LED driver	5		2	
2	12	[Win] CAN Wrapper	5		5	
2	15	Initialize Readme file	1		1	
2	14	Create the description of the planned software architecture	3		2	
2	6	Create *.s19 to Binary converter	3		3	
2	5	Implement a function for file browsing, selecting, and simple processing	5		5	
2	11	[MCU] Flash driver	5		5	
3	34	[MCU] Build Process	3		2	
3	35	Implement UDS Communication Specification	3		3	
3	17	Implement a function to select CAN-HW	5		3	
3	19	Integrate CAN Wrapper with GUI	3		8	
3	21	Document / obtain documentation for relevant part of UDS	3		5	
3	33	[GUI] QT App Build process	3		5	
3	7	[UI] Implement "Updating in progress" indicator	2		2	
3	27	Design a Mockup for ECU Listing UI	3		3	

Sprint	Goal	Feature Name	Est. Size	Est. Remaining	Real Size	Real Remaining
3	25	[MCU] Create / modify existing project to demonstrate module functionality	3		2	
4	40	[MCU] Communication Layer (IsoTP)	8		8	
4	39	[WIN] Communication Layer (IsoTP)	5		8	
4	44	[MCU] UDS Tx	5		5	
4	43	[MCU] UDS messageInterpreter (Rx)	5		5	
4	31	[MCU] Implement Real Bus in CAN Driver	5		8	
4	42	[WIN] UDS Tx	5		3	
4	41	[WIN] UDS messageInterpreter (Rx)	5		3	
4	30	Review transitive include of e.g. "lib/vxlapi.h" in CAN_Wrapper	3		1	
5	18	Restart the ECU (soft reset) over GUI	3			
5	47	Build Process Video				
5	23	Packaging of Windows Application - .zip / Installer	2		2	
6	67	Clarify License Text	3			
6	66	[GUI] Add Clear Log Button	2			
6	75	[Bugfix] Investigate bytes lost maybe in IsoTP	5			
6	52	[Win] Fix CAN-Bus not opening, when already in use by another app, e.g. CANoe	1			
6	68	GUI changes	5			
6	51	Populate MCU List from CAN Bus	2			
6	73	Move buildscripts into subdirectories	1			
6	81	Midterm Refactoring and Bugfixing	3			
6	72	Update Software Architecture Diagram	3			
6	69	Refactoring of Drivers	5
